

July 28, 2010

Subject: I-Suite Application Version 10.01.01

Version 10.01.01 of the I-Suite Application is now available for download at <u>http://isuite.nwcg.gov</u>.

The primary focus of this release is to implement additional security requirements, update the database engine to MS SQL Server 2005 Express, and to fix several outstanding application defects. The Release Notes are posted on the I-Suite Web Site.

The Full Server and Full Client install can be installed mid-incident. Run a backup of your database prior to updating I-Suite.

System Administrative privileges <u>are</u> required to properly install the full I-Suite Server and the full Client installations. A reboot must be performed after the installation is finished and re-login with System Administration privileges for the install to complete. All previous versions of I-Suite must be uninstalled before installing Version 10.01.01. Update installers of version 10.01.01 are not available.

Attached to this document are the I-Suite Version 10.01.01 Installation Instructions. For further assistance with the installation, call the I-Suite Helpdesk at (866) 224-7677.
